ECORASTER® for Golf applications

High-quality ground reinforcement systems in use

Creating durable and dependable areas. Maintaining natural properties.

Create aesthetically pleasing, low maintenance areas quickly and easily with our ECORASTER® ground reinforcement system. Simply design greened parking lots or ensure the accessibility of your installation. Thanks to the versatile use of our high-quality "Made in Germany" products, you can create durable areas while maintaining the natural characteristics of the ground.

You benefit twice: Your guests will appreciate the accomplished ambience while you save money and time.

- » Walkways

Your benefits

- ✓ Easy and quick installation
- ✓ Extremely high durability
- ✓ Low maintenance
- ✓ Weather-resistant, shockproof and UV-resistant
- ✓ German quality brand with more than 20 years tradition

20 year
warranty

ECORASTER

ECORASTER® Bloxx, the permeable solution with a paving look.*

- » No clogging
- » Integrated drainage
- » No tripping
- » Accessible
- » Creative
- » No need for grouting
- » Quick installation
- » Easy-care
- » Highly durable
- » Secure position lock
- » Permeable
- » Made in Germany

Unpack Ecoraster® Bloxx, snap together and add gravel. No grouting required.

Bloxx elements snap together safely in seconds.

The Bloxx stone filling can be replaced/changed without affecting the composite system. (e.g. when replacing soiled gravel)

ECORASTER® Bloxx fits seamlessly into the ECORASTER® system.

Hot weather conditions are no cause for concern, thanks to the integrated expansion joints.

The key feature: The new elements feature an integrated anti-clog drain channel. This unique design guarantees a constantly high runoff coefficient, thanks to the permeable surface which allows rainwater to easily drain away.

The integrated drainage system is not greatly affected by soil and rough dirt, making unsightly surfaces, soiled joints or dangerously loose paving blocks a thing of the past.

We develop useful and efficient reinforcement solutions for a greener environment.

Made in Germany – used worldwide.
